From scientific rationale to clinical evidence

1

Innovative rationale

Formulations aligned with emerging scientific evidence.

2

Velleja® Research

Spin-off founded in 2006 to support patents and exclusive formulations.

3

Clinical validation

Cooperation with medical centers, hospitals and universities.

4

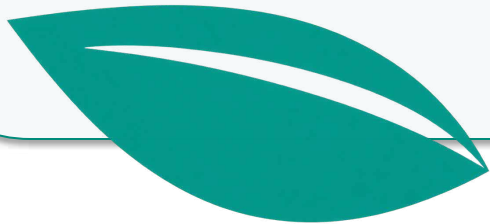

Medical education

Evidence translated into medical detailing, training and professional education.

Two core platforms, one pharmaceutical approach

Advanced Botanicals

Finished products based on standardized and titrated botanical extracts, combined with modern pharmaceutical technologies to optimize biopharmaceutical and clinical performance.

Precision Probiotics

Finished probiotic products based on well-documented strains selected for specific health benefits and validated through scientific investigation and clinical trials.

A medical-led go-to-market model

140-person sales force providing medical information to key specialties across Italy.

Continuous training of medical representatives and evidence-based detailing.

Dedicated education for healthcare professionals through PharmExtracta Campus.

Scientific content and publication updates through digital channels.
