

Precision in Every Milliliter

Single-Use (SU) Sampling Platform for Cell & Gene Therapy (CGT) Manufacturing

Explore Avantor's configurable portfolio of closed SU sampling systems tailored for diverse modalities, facility formats and production stages.

When every milliliter matters, this guide helps you quickly identify the closed sampling system best aligned with your CGT process.

Beyond standard applications

The Avantor SU sampling platform includes standard offerings, augmented by configurable assemblies based on individual tubing, vessel and end-connector requirements. For bags, bottles or other containers requiring weldable closed-loop integration vessel, Avantor offers alternative assemblies based on individual tubing, vessel and connector requirements.

READY TO PROTECT WHAT MATTERS?
