PROBIO IMMUNE - SOFT GUMMY

WITH THE PROBIOTIC LACTO- BACILLUS PARACASEI CALLED LAC-SHIELD, VITAMINS & ZINC

FOR A STRONG IMMUNE SYSTEM

SUGAR-FREE | SOFT GUMMY WITH VITAMINS & ZINC | ORANGE FLAVOUR

- + Stimulating immune function [1]
- + Reduces incidences of common cold [1]
- + Shortens duration of a cold disease [1]
- + Reduces severity of symptoms [1]
- + Increases efficacy of influenza vaccination [2]
- + Vitamins C & D as well as zinc contribute to the normal function of the immune system
- + Fruity fresh orange flavour

Soft gummies and jellies are a very popular galenic form in the pharmaceutical and the food industry. They are organoleptically stimulating and suitable for adding active ingredients. These delicious orange flavoured soft gummies contain essential vitamins C & D3, as well as zinc and the innovative probiotic 'LAC-Shield', a heat treated non-viable lactobacillus paracasei strain with unique immunological functions.

**Sugar-free soft gummy with LAC-Shield, vitamins & zinc –
 For a strong immune system**

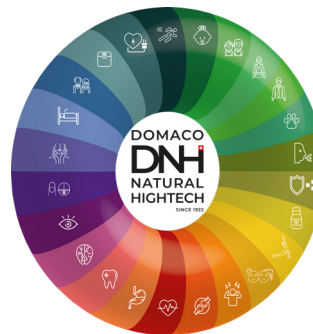

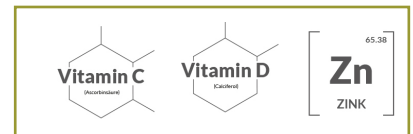

Effective – delicious – innovative

The Probio Immune soft gummy contains the recommended daily amount of vitamin C and D. Zinc and vitamin C are a powerful duo against free radicals and support the defense against oxidative stress.

The innovative LAC-Shield is a lactobacillus paracasei strain with unique immunological functions. LAC-Shield (heat-killed lactobacillus paracasei MCC1849) was selected from the several thousand strains of lactic acid bacteria. It greatly surpasses the other lactic acid bacteria in immune activity. It has a high ability to induce the production of interleukin-12 (IL-12) – a cytokine with important regulatory functions, bridging innate and adaptive immunity. LAC-Shield was named for its unique immunological function serving as a „shield“ to protect the human body against invading enemies. It significantly reduces the incidence of a common cold, the total number of days symptoms last and the severity of symptoms [1].

According to another human clinical study [2], LAC-Shield additionally increases the efficacy of the influenza vaccination by enhancing immune response.

Adding a natural orange flavouring makes this soft gummy absolutely delicious and refreshing.

Do not miss the opportunity to take advantage of this market trend for you. Be inspired and let us create your product under your brand.
