

WHO WE ARE

Injection molding contract developer and manufacturer

High-precision, high-volume cleanroom production and assembly

Trusted in pharma and medtech

Production sites in Switzerland and North America

MARKETS

Pharma/Drug Delivery

Diagnostics

Medical Devices

KEY METRICS

ISO 5, 7, and 8 cleanroom area

24/7 production

+1,500,000,000 units/year

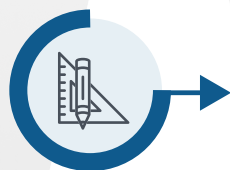

QUALITY

- Certified ISO 13485
- FDA-listed to CFR820 standards
- Project and manufacturing processes to cGMP-standards
- Risk management according to ISO 14971
- DQ, IQ, OQ, PQ qualifications and validations

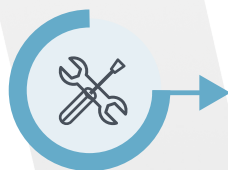

CAPABILITIES

- Design for manufacturing (production- and plastics-optimized part design) and prototyping
- Cleanroom production and packaging solutions
- High-precision injection molding
- Micro- and multi-component molding
- Automated assembly with inline inspection
- Comprehensive project management for seamless execution

OUR PROCESS

Product design

Industrialization

Process validation

Final packaging and logistics
