

CPME

(Cyclopentyl Methyl Ether)

Greener, safer alternative to
THF and CMR solvents

Very Hydrophobic

Low Peroxide Formation

OMe

CAS: 5614-37-9
REACH Registered
TSCA Listed
MITI Number (Japan): 3-4548

NEWS!!!

Listed in ICH guideline
Q3C(R8)-Residual Solvent

Use CPME for your whole synthesis process:

Organometallic Reaction

(Grignard Reaction/Reactions Using n-BuLi/Cross-coupling Reaction etc.)

Reactions Using Lewis Acid/Crystallization/Extraction
