About CRC Labs

Our experienced personnel have been involved in numerous submissions to the Food and Drug Administration.

We routinely issue Certificates of Analysis required for release and monitoring of final manufactured product. Our company prides itself in providing a quality product in a timely fashion at a very competitive price.

Our Mission

Our mission is to provide pharmaceutical services at affordable prices. Our emphasis is to create an environment that will provide fast, accurate analysis and reporting catered to the needs of our customers. Our staff strives to efficiently communicate and interact with our clients in a friendly professional manner.

Company Services

- **Regulatory Services**
- **Report Writing**
- **Method Development**
- **Stability Program Fulfillment**

Laboratory Capabilities

- FDA inspected cGMP laboratory
- Proficient in peptide analysis
- HPLC Analysis
 - Assay, Identification, and Purity Detection by:*
 - *UV, Fluorescence, and Electrochemical*
 - *HPLC method development*
 - *HPLC method validation*
- Moisture Content (Sensitive to 10 mcg of water)
- Particle Testing
- Stability Testing
 - Stability chambers constantly monitored at:*
-70°C, -20°C, 5°C, 25°C, and 40°C
- FTIR Identification Analysis
- Loss on Drying
- Analytical Microbalances
 - Accurate down to 1 and 0.1 micrograms*
- Small Scale Lyophilization for:
 - Method Development*
 - Production of reference standard material*
- UV Spectrophotometry
- LC Purification using:
 - High throughput flow rate (Large columns)*
- Appearance Testing
- Reconstitution Testing
- Assist in troubleshooting manufacturing including in-process testing when necessary.
