

MTG ECO GREEN

INNOVATION AND SUSTAINABILITY: THE NEW FRONTIERS OF MTG

Bio-Based Rubber

New hose lines made from bio-attributed, plant-based rubber. Same outstanding performance and durability with a significantly lower environmental footprint.

Devulcanized Rubber

Advanced compounds developed from recycled, devulcanized rubber. A smart way to reduce waste and give new life to valuable materials.

Greener Processes

We are introducing multiple improvements to our production processes to reduce our carbon footprint and operate more responsibly every day.

Lower Impact, Same Quality

With MTG ECO GREEN, innovation and sustainability go hand in hand. We continue to deliver top-level solutions while actively protecting the environment.
