

Super-Derma[®]

ATD

USEFUL IN THE PRESENCE OF ATOPIC DERMATITIS

PRODUCT CLASSIFICATION

Cosmetic

ACTIVE INGREDIENTS

- Aliophen 1%
- Calendula 0,25 %
- Allantoin 0,35 %
- Shea Butter 1%
- Dimethicone 1%

INDICATION: Super Derma ATD is perfect for the treatment of atopic dermatitis due to its delicate moisturizing and emollient formula. For topical use only.

HOW TO USE: Apply a layer of cream one to several times a day directly on the affected parts as needed.

PACKAGING: Aluminium tube of 30 ml, inserted in a fold box with leaflet.

ALIOPHEN

Aliophen[®] is an extract derived from malts and hops, available in both liquid and powder form. The malts and hops that make up Aliophen[®] are rich in amino acids, vitamins, minerals, and micronutrients, such as polyphenols. These polyphenols belong to a vast group of plant-derived molecules with various biological activities.

CALENDULA

It has natural anti-inflammatory, antimicrobial and skin-soothing properties.

ALLANTOIN

Is a gentle, non-irritating compound known for its skin-soothing and healing properties. It acts as a humectant, helping the skin retain moisture and preventing dryness. It has anti-inflammatory properties and reduces itching, redness, and irritation, providing relief from eczema flare-ups.

SHEA BUTTER

Rich in fatty acids (oleic, stearic, linoleic acids) that restore skin moisture. Natural, deeply nourishing emollient that helps soothe and protect children's sensitive skin affected by atopic dermatitis.

DIMETHICONE

It is a silicone-based skin protectant widely used in pediatric skincare due to its ability to create a protective barrier on the skin, preventing the moisture loss.
