

ACQUA/ADT-K

MTG HOSE FOR DRINKING WATER

ACQUA/ADT-K is the new MTG hose for **Drinking Water**, developed in accordance with **DIN EN 16421 - KTW-BWGL** and **KTW evaluation criteria**, Annex A "Plastics" and Annex E "Thermoplastic Elastomers" in cold water at +23°C and hot water at +60°C.

The validation for warm water ensures the **purity and original organoleptic properties** of the water, even at high temperatures, a crucial factor for hygiene, safety and taste preservation.

Manufactured with **high-quality materials**, the hose is free from plasticizers, phthalates, nitrosamines, and ADI free. It has successfully passed migration tests in accordance with EU Regulation 10/2011.

Thanks to its **flexibility**, it can be easily rolled up on a reel for convenient handling and storage.

The hose is also **suitable for CIP (Clean-In-Place) cleaning**, allowing efficient automated sanitation processes that help reduce downtime and operating costs.
