# About TPA

Taiwan Pharmaceutical Alliance (TPA) was established the Medical and Pharmaceutical Industry Technology and Development Center (PITDC), aiming to promote Taiwan Pharmaceutical image and products to global market.

TPA is comprised of at least 21 prestigious and reliable Pharma-related enterprises and which is still growing every year. TPA has a ONE-STOP collection of APIs, Niche Generics, 505(b)(2)s, Biosimilars, CRO services and Medical Supplies where nearly 90% of therapeutic areas are covered. The finished formulations contain various types of Oral Forms, Semi-Solids, Injectables, Eye Drops, MDIs/DPIs/Nasal Sprays, Patches, Topicals, etc.

TPA also provides various of services from CMO/CDMO, CRO, CRDMO, Regulatory & IP Consultation etc. The manufacturing sites of all TPA members are PIC/S GMP accredited, most are certified by US FDA, EU EMA, and Japan PMDA.

TPA's presence is throughout the world in many regions, such as the US, Europe, MENA, Japan, LATAM and ASEAN. Our high-quality products have been recognized by global partners.

The vision of TPA is to collaborate with the international pharmaceutical community and to maintain long-term relationships with our partners. We are committed to bringing the best medicine to patients and to fulfilling the global unmet medical needs.

## Commercialised Products

- APIs, Rx, OTCs, 505(b)(2), Medical Supplies, Dietary Supplements
- Biologics, Small Molecule, Hormone, High Potency
- Antibody-Drug Conjugates (ADCs), Peptide-Drug Conjugates (PDCs)

## Special Dosage Forms

- Sterile (Liquid, Semi-Solid, Solid)
- Patches
- Aerosol
- Long-Acting Injectables (LAIs)
- Osmotic-Controlled Release Oral Delivery System (OROS)
- Soft Capsules

## One-Stop Services

- Total Solution Services (CDMO, CMO, CRO, CRDMO)
- In/Out Licensing
- Regulatory & IP Consultation
- Business Matching

## Technology Features

- Hotmelt-Extrusion (HME)
- Nanotechnology (ex: Emulsion & Milling)
- Spray Dry

台灣諾亞生技股份有限公司  
Bionovax Corp.

Bionovax

Services:  
Heparin API manufacturing

Therapeutic Areas:  
1. Anticoagulant

Dosage Forms:  
1. Injectables  
2. Solution

Introduction:

BIONOVAX Corp completed the main construction of its Active Pharmaceutical Ingredient (API) manufacturing plant in March 2017 at Longtan Science Park, which is managed by Hsinchu Science Park. In 2019, the company established an API manufacturing facility compliant with PIC/S GMP standards.

With its innovative manufacturing processes, the company obtained approval for the registration of domestically produced heparin sodium API in August 2023. In 2024, it was certified by the Ministry of Health and Welfare's Food and Drug Administration (TFDA) as Taiwan's first and only pharmaceutical plant meeting PIC/S GMP standards for heparin APIs.

The facility specializes in the production of high-quality heparin, including Unfractionated Heparin (UFH) and Low Molecular Weight Heparin (LMWH) anticoagulant APIs.

Heparin is widely used in surgical procedures, particularly in cardiovascular surgeries, as well as in dialysis treatments and in conjunction with medical devices. It is also employed as an anticoagulant during stroke treatments to prevent clotting in blood vessels and in blood banks to preserve fresh blood.

With the aging global population, the prevalence of cardiovascular and cerebrovascular diseases continues to rise. Heparin is considered one of the most essential and widely used anticoagulant and antithrombotic drugs in modern clinical practice.

Highlights of the Year:

The heparin raw materials manufactured by Bionovax Corp. strictly adhere to the guiding principles of ICH Q3D, providing a comprehensive solution to ensure that the entire production process effectively removes various viruses, preventing drug contamination. Additionally, heavy metals are eliminated during production.

中國化學製藥股份有限公司  
China Chemical & Pharmaceutical  
Co. Ltd. CCPC

Services:  
CMO, CDMO, In/Out Licensing

Therapeutic Areas:  
1. Anti-Infections  
2. Respiratory System  
3. Immunosuppressant  
4. Hematology/Oncology  
5. Circulatory System

Dosage Forms:  
1. Osmotic Controlled Release Oral Delivery System (OROS)  
2. Repeated-Release System  
3. Multiple-Layered Tablet  
4. Multiple-Unit Pellet System  
5. Solid Dispersion System  
6. Pre-Filled Syringe  
7. Lyophilized Parenteral

Introduction:

Founded in 1952, China Chemical & Pharmaceutical Co., Ltd. (CCPC) is dedicated to the innovation, R&D, manufacturing, and service and quality improvement. Currently, CCPC provides more than 430 pharmaceutical products for both human and animal uses as well as healthcare products for humans. The scope of services ranges from CMO/CDMO services of pharmaceutical and healthcare products, R&D services, household products and beauty cosmetics marketing, and home care services.

Since established, CCPC has a long and well reputed record of collaboration with worldwide partners in supplying products from PIC/S GMP, Japan PMDA, US FDA certified facilities. CCPC strategizes in vertical integration of its affiliates to focus on the development of APIs and generic drugs to target global markets. We hold an exceptional R&D team with unique technology platforms in Taiwan in creating product competitive advantages for our global partners; thus broadening CCPC's collaboration opportunities and enhancing brand image internationally.

2. Solid preparation: Lozenges, Film-coated tablets, Capsules, Granules, Tablets, and Pellets  
3. Liquid for External

### Introduction:

Embodying the principle that the essence of medicine lies in morality, pharmaceuticals are dedicated to serving the public good. In 2014, Chung Mei Pharma Group established "Chung Mei Biopharma." Founded in 1936, Chung Mei Pharmaceutical Co., Ltd. (CM) has primarily focused on over-the-counter pharmaceuticals.

Over the past eight decades, we have consistently collaborated with leading pharmaceutical companies, research institutions, and biotech centers on both local and global scales. We are dedicated to integrating cutting-edge manufacturing techniques and innovative concepts through continuous research and development.

Chung Mei provides comprehensive services, from professional manufacturing to end-user sales (OEM & ODM), while streamlining the biotech medical supply and distribution chains. Our production capabilities include oral liquid preparations (syrup, solution, emulsion, suspension), solid preparations (lozenges, film-coated tablets, capsules, granules, tablets, and pellets), external liquid preparations (topical solutions), and health supplements (tablets, capsules, powders, granules, etc.).

We have obtained certifications for cGMP, PIC/S GMP, ISO 22000, and Halal, demonstrating our adherence to the highest quality standards. With these credentials, we are committed to bringing Taiwan's high-quality medicines to the Chinese and Asian markets, elevating the 'Made in Taiwan' brand to a source of national pride.

### Highlights of the Year:

Bioanalysis, Biologics, BA/BE, Clinical Trial  
CRO (Contract Research Organization)

**Contract Research Organization**

- Specialty:
1. Bioequivalence Study
  2. Clinical Research
  3. Biopharmaceutical Analysis
  4. Pre-clinical & Clinical Bioanalysis
  5. Regulatory Affairs & Consultation

**Introduction:**

Mithra Biotechnology Inc., the first Contract Research Organization (CRO) in Taiwan since 1988 offers integrated and multi-dimensional CRO services including bioanalysis for chemical drugs and biologics, full characterization plans for biologics, BA/BE studies, and early phase clinical trials to facilitate pharmaceutical development. Mithra's mission is to bring innovative drugs from pre-clinical study to first-in-human clinical research. With profound expertise in biologics diverse in mAbs, ADCs and other new modalities, the company's services include structural characterization, PTMs identification, disulfide bond assignment, carbohydrate structure analysis, variants analysis and biosimilar comparison or lot-to-lot QC.

The company has proven expertise and experience in meeting international standards to serve the fast growing pharmaceutical industry, as evident from the accredited GLP compliance laboratory and GMP QC testing laboratory working on both small molecule drugs and protein drugs. The laboratory is equipped with state-of-the-art analytical instruments for sensitive and high throughput drug quantification in various biological matrices. A great variety of comprehensive methods have been developed and validated for contract research, as well as SOPs been established and applied to ensure the result been delivered to its highest quality.

**Highlights of the Year:**

1. Clinical Trial and Laboratory Services
2. Bioanalysis
3. Biologics
4. BA/BE

3. Psychiatry
4. Oncology
5. Respiratory
6. Rare Diseases

Dosage Forms:

1. Tablets
2. Capsules
3. Injectables
4. Solutions
5. Gel

**Introduction:**

OEP Group is a global science-based company specializing in health, nutrition, pharmaceuticals, and cosmeceuticals. Established in 1982, Orient EuroPharma Co., Ltd. (OEP) has led innovation and became publicly listed on the Taipei Exchange in 2003 (stock code: 4120). To expand its capabilities, OEP founded OrientPHARMA (stock code: 4166) in 2008 and OP NanoPharma in 2014, focusing on new drug development and manufacturing. This vertical integration enhances expertise across pharmaceutical R&D, clinical development, production, and marketing. OEP also provides comprehensive CDMO services at its US FDA and PIC/S GMP-certified facility, specializing in injectable product development, aseptic filling, lyophilization, and analytical services.

With a strong commitment to quality and innovation, OEP Group continues advancing science and healthcare globally, delivering solutions that improve health and well-being.

Pei Li Pharmaceutical Industrial  
Co., Ltd. **Pei Li**

Services:  
CMO, CDMO, R&D, In/Out Licensing

Therapeutic Areas:  
1. Hormones, Obstetrics & Gynecology  
2. Genitourinary  
3. Metabolic Diseases  
4. Gastroenterology (GI)  
5. Oncology (Non-Cytotoxic)  
6. Anti-Infectives (Antibiotics, Anti-TB)  
7. Cardiovascular

Dosage Forms:  
1. Tablets  
2. Capsules  
3. Soft Capsules  
4. Ointment  
5. Suppositories

**Introduction:**

Pei Li was established in 1976, focusing on research and development of high barrier generic drugs and healthcare products. Our facility has been approved by Japan PMDA and Taiwan PICs/GMP inspection. There are 7 products which have been approved in Japan. Among these products, four are hormone-related drugs and one is high potent soft capsules.

**Pei Li's Specialty:**

1. Specialize in developing and manufacturing soft gelatin capsule (soft gel) for poorly soluble compounds or highly potent active ingredients.
2. Specialize in developing and manufacturing highly potent pharmaceutical products. Meanwhile, Pei Li has a dedicated production facility for highly potent pharmaceutical products, which can prevent cross contamination between high potent products and general pharmaceutical products.

**Highlights of the Year:**

1. Soft Gelatin-Capsules
2. Hormone Related Products

2. Capsules/Soft Capsules  
3. Injections  
4. Solutions  
5. Lyophilizate

### Introduction:

Sinphar Pharmaceutical is a publicly traded company and a certified PIC/s GMP, ISO 9001, ISO 14001, ISO 22000, Food GMP and ISO 45001 pharmaceutical company in Taiwan.

"Safety, stability, validity, and convenience" are elements we constantly emphasize in our quality policy. Holding both strong R&D capability and stringent control over product quality, Sinphar has fully demonstrated trustworthy techniques and skills in food products, cosmetics, pharmaceuticals, and anti-cancer drugs in both own brands and contract manufacturing services.

Following years of development, Sinphar has gradually consolidated its R&D capabilities in cancer drugs and new drugs, allowing us to build Taiwan's first pharmaceutical R&D center that specializes in isolated, automated production of cancer injections and cytotoxic agents. For sales distribution channel, Sinphar was the first to establish Sinphar Counter, a shop-in-shop business model, in 1997. Now there are approximately 1300 branches across Taiwan, making Sinphar Counter the largest specialized pharmacy in Taiwan.

### Introduction:

Swiss Pharmaceutical was established in 1966 with the mission of developing and manufacturing quality pharmaceutical generics products. Throughout the past 55 years, Swiss operates with the mindset of continuous improvement to pursue this mission. Headquartered in Tainan City and currently has 450+ outstanding staffs and annual revenue of USD 40 million in FY2024.

Swiss has gone through several transformation. The most recent key transformation started in 2007, when we acquired a 40,000 m2 property to build our new facility. The facility was PIC/S GMP certified in 2012 and has opened various of opportunities which eventually lead to our first US ANDA CMO project. Swiss was inspected in 2017 and 2019 by the US FDA.

For next step, we will continue to sharpen our skill in both product development and manufacturing and are seeking for partners who has the same mindset to form strategic alliance.

### Introduction:

Synmosa Biopharma Corporation, a listed company in Taiwan OTC stock market (TW.4114), was founded in 1980. We develop sustainable business ranging from R&D, manufacturing, contract manufacturing as well as sales and distribution for both pharmaceuticals and health supplements.

Through constant mergers and acquisitions of potential domestic candidates, we have built a series of PIC/s manufacturing plants that specialized in the manufacturing of metered-dose inhaler (MDI), hormone preparations, nasal sprays, effervescent tablet, granules and even ointment, shaping us into the leading pharmaceutical company in various therapeutic areas of expertise such as cardiovascular, respiratory, hormones, urology, oncology, and CNS. Until today, we are still continuously expanding and putting more and more efforts in developing innovative medications and brand-name drugs.

As for global business development, we show direct presence in Hong Kong as well as Singapore, Philippines where we allocated our own competent sales and marketing team; whereas for Northeast Asia and Southeast Asia market we have a long-established and stable collaborative business relationship with local partners. We believe in improving the quality of lives of those in need with the highest standard of pharmaceutical manufacturing technology as we move towards our vision of becoming the foremost biopharmaceutical corporation in Asia.

**Introduction:**

Taiwan Biotech is a PIC/S GMP pharmaceutical manufacturer in Taiwan. Established in 1945, we have more than 1,000 staffs now and have devoted ourselves to develop and supply the superior generic drugs.

The products we offer cover a wide range of therapeutic categories focus on cardiovascular, CNS, diabetic, respiratory and eye care drugs. With the complete production capability, we provide the oral solids, injections, inhalation solution, eye drops, TDDS patch, creams and ointments as a one-stop shop to our customers.

Taiwan Biotech is specialized in the manufacture of aseptic Blow-Seal-Fill products, including the unit dose eye drops, contact lens care solution, inhalation solution, injection, oral solution and wound cleaning solution. Filling volume is available from 0.2ml to 20ml. With its profession in this field, Taiwan Biotech is a CMO partner for the top OTC and generic companies for over 20 years.

We provide the professional CMO/CDMO services and welcome the out-licensing and in-licensing business opportunities.
