

Beyond expectations.

Whether you are a virtual start-up or a large established organization, you and your patients deserve subject matter experts who take ownership of your program from clinical trials through commercial supply.

Partnering with Alcami as your contract development and manufacturing organization connects you to a US based team of dedicated professionals with over 40 years of experience advancing and supporting products through every stage of the development lifecycle.

We are unlocking the potential of transformative medicines.

DRUG PRODUCT MANUFACTURING

Alcami offers robust, GMP, scalable solid dose and parenteral manufacturing equipment trains delivering confidence from clinical through commercial supply - with operations ready to scale in tandem with your development & approval milestones. Alcami's development and manufacturing capabilities support small and large molecules, lyophilized products, complex formulations, & DEA-scheduled drug products.

Formulation Development & Solid-State Characterization

Oral Solid Dose Development & Manufacturing

Parenteral Development & Manufacturing

Packaging & Labeling

LABORATORY SERVICES

Built on a foundation of comprehensive analytical services for pharmaceuticals including biologics, our advanced laboratories and experienced scientists specialize in **method development, validation, and testing**. These services ensure product quality, compliance, and informed decision-making from early development to commercialization, supporting clients in delivering safe and effective products to market.

Small & Large Molecule Development

Compendial Testing: Chemistry & Microbiology

Method Establishment & QC Testing

Stability Storage & Testing

Biologic Modalities Supported:

- Recombinant Proteins (mAbs)
- Cell & Gene Therapies
- Peptides
- Oligonucleotide (DNA, RNA)
- Vaccine

PHARMA STORAGE AND SERVICES

Alcami offers premium, GMP pharmaceutical storage solutions and support to ensure your critical products remain stable and secure. Our storage facilities are equipped with multiple levels of redundancies – including backup generators, dual HVAC systems, and backup LN₂ refrigerant supply onsite.

Additionally, they are equipped with 24/7 monitoring and state-of-the-art security protocols to ensure your critical products are protected within precise parameters.

GMP Storage

Controlled/Ambient Storage

Stability Storage

Refrigerated, Freezer, Ultralow, Cryogenic Storage

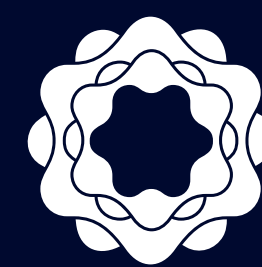

Aliquoting/Sampling, Labeling, Custom Kitting, Local Courier Services, Cycle Counting & Inventory Services

We also offer a suite of complementary pharma support services with trained experts, customized to fit your unique needs, in-house or on-site:

Commissioning Qualification & Validation (CQV)

Metrology & Calibration services – including primary standards calibration

Environmental Monitoring & Cleanroom Services
