### Best-in-Class Partnerships

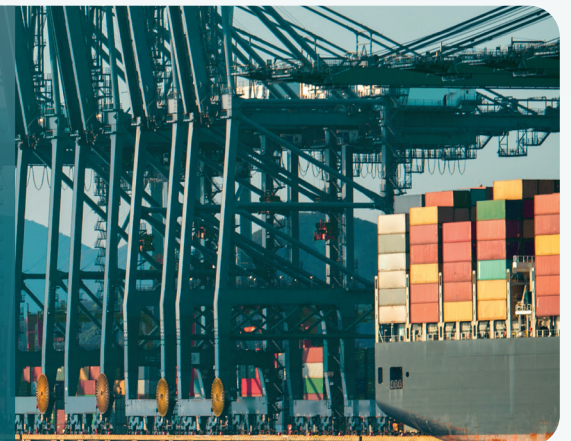

### About Us

Trezix Software Inc. is a new-age technology company redefining how businesses navigate global trade. Founded in 2020 and incorporated in 2022, Trezix was built with the vision to simplify trade complexity.

Trezix creates AI-native trade orchestration solutions that empower enterprises to manage compliance, documentation, supply chain, and cross-border operations with precision, collaboration, and agility. Its platform delivers 100% end to end visibility across the value chain, up to 50-70% efficiency improvements, up to 30-40 savings across the Exim process, and real-time integration that leads to 100% audit-proof traceability, enabling businesses to control, collaborate, and comply in their trade operations.

With millions of trade transactions powered to date, Trezix is on a mission to become the world's leading export-import platform.

### Integration

- ERP
- Regulatory Bodies
- Banks
- 3PL

## Why Global Enterprises Choose Trezix

### AI-First Trade Stack

Purpose-built with AI at the core, not bolted on, Trezix delivers real-time decision intelligence, process automation, and compliance predictability—tailored to your sector's complexity.

### Plug & Play With Your Ecosystem

Seamless integration with SAP, Oracle, NetSuite, MS Dynamics, and global systems used by freight, customs, and banks. No rip-and-replace. No downtime.

### Audit-Proof Compliance. Always.

Be inspection-ready with complete document intelligence, traceability, and explainable AI—trusted by finance, legal, and quality teams across regulated industries.

### Engineered for Multi-Entity Scale

Whether you're a contract manufacturer, a global auto OEM, or a consumer goods exporter, Trezix simplifies multi-country, multi-plant, and multi-license operations under one platform.

### Global Compliance Confidence

Stay ahead of shifting trade regulations, bilateral policies, carbon tariffs, and ESG mandates. Trezix ensures policy-aligned execution with built-in regulatory logic.

### From Reactive Ops to Predictive Trade

Trezix unlocks trade data buried in silos to power risk forecasting, landed cost visibility, and port delay prediction—vital for high-volume exporters to drive efficiency.

### Focused Solution for the Pharma Industry

Our integrated platform replaces Excel and email with automated, no-touch processes for effective traceability and visibility, keeping analytics-ready, business-critical data at your fingertips.
