About Us Problem We Solve

Founded in January 2022, Trezix is an AI-native SaaS platform revolutionizing the global import/export value chain. Built for modern trade demands, Trezix eliminates friction across documentation, compliance, and cashflow by automating 90% of manual processes, consolidating first- and third-party data, and delivering real-time insights and control.

In a global economy driven by speed, regulatory shifts, and digital transformation, Trezix is reimagining how enterprises manage cross-border trade. We're not just digitizing workflows—we're building an AI-native infrastructure for end-to-end trade management that is intelligent, scalable, and policy-aware.

Our mission: to make global trade operations seamless, intelligent, real-time, collaborative and compliant by design needed to scale cross-border operations with confidence & credibility

Trade Process Management

- Purchase Order (PO) creation

- Profitability
- Landed Cost Estimate across 100 countries

Control

- Single Source of Data
- Efficiency
- Single Digital Trail

Integration

- ERP
- Regulatory Bodies
- Banks
- 3PL

Why Global Enterprises Choose Trezix

AI-First Trade Stack

Purpose-built with AI at the core, not bolted on. Trezix delivers real-time decision intelligence, process automation, and compliance predictability—tailored to your sector's complexity.

Plug & Play with Your Ecosystem

Seamless integration with SAP, Oracle, NetSuite, MS Dynamics, and global systems used by freight, customs, and banks. No rip-and-replace. No downtime.

Audit-Proof Compliance. Always.

Be inspection-ready with complete document intelligence, traceability, and explainable AI—trusted by finance, legal, and quality teams across regulated industries.

Engineered for Multi-Entity Scale

Whether you're a contract manufacturer, a global auto OEM, or a consumer goods exporter, Trezix simplifies multi-country, multi-plant, and multi-license operations under one platform.

Global Compliance Confidence

Stay ahead of shifting trade regulations, bilateral policies, carbon tariffs, and ESG mandates. Trezix ensures policy-aligned execution with built-in regulatory logic.

From Reactive Ops to Predictive Trade

Trezix unlocks trade data buried in silos to power risk forecasting, landed cost visibility, and port delay prediction—vital for FMCG, retail, and high-volume exporters.

Industry-Aligned Solutions

Trezix offers vertical-specific solutions for 7 industries:

Automotive, Textiles, FMCG, Consumer Goods, Chemicals, Pharma & Life Sciences, Electronics & Precision Manufacturing, and Steel—with more industries in the pipeline.
