

European Custom Manufacturing Partner – From Development to Production

Reduce strategic dependence. Secure your supply chain. Protect your IP.

Who We Are

We are a privately owned Central European chemical manufacturer with fully equipped production sites and 77 years of experience in fine chemical synthesis. Since the 1980s, we have focused exclusively on B2B partnerships, specializing in custom and toll manufacturing of **intermediates for pharmaceutical and specialty chemical applications.**

What We Offer

 **Full-cycle collaboration** from lab- and kilo-lab scale development to multi-ton production

 **Flexible infrastructure** with glass-lined and stainless-steel autoclaves (2000–4000 l), pressure reactions, vacuum drying, centrifuge separation, distillation and rectification

 **Key technologies:**

- Hydrogenation (Pd/C)
- Alkylation, Acylation, Acetylation
- Sulfonation, Sulfochlorination
- Halogenation, Oxidation
- Mannich reaction, Resolution
- Esterification, Acid chloride synthesis
- Metal-hydride reactions and more

 **Batch sizes** up to hundreds of kilograms

 **ISO 9001-certified**, regularly audited by SGS and international customers

Why Work with Us?

 **EU-based manufacturing** – regulatory compliance, fast delivery, and stable pricing

 **IP protection and confidentiality** – avoid unintended technology leakage

 **Let's reduce dependency of the European companies**

 **We believe in partnership, not transaction** – co-development builds trust and long-term efficiency

Let's discuss your synthesis needs.
